Economic Review - April 2024

## MPS - Policy rate unchanged at 22\%

In-line with our expectation, the central bank in its latest monetary policy announcement held on 29th April 2024, kept policy rate unchanged at $22 \%$. The monetary policy committee (MPC) noted macroeconomic stabilization measures are contributing to improvements in both inflation and external position, amidst a moderate economic recovery. However, the MPC viewed that the level of inflation is still high.

Key developments since the previous meeting include modest pickup in economic activity amid improvements in agricultural output. There was a sizeable current account surplus in March 2024, which helped stabilize FX reserves despite substantial debt repayments and weak financial inflows. Inflation expectations of consumers inched up in Apr'24, whereas those for business declined. Lastly, central banks in advanced economies have opted for a cautious policy stance after noticing a slowdown in the pace of disinflation in recent months.

The MPC highlighted the current account, which has turned out better than expected, recording a sizeable surplus of USD 619 million in March'24, mainly owing to Eid-related surge in remittances. Exports continue to exhibit steady growth (led by rice) while imports have decreased in the wake of better domestic agricultural output and moderate economic activity.

The MPC also noted that inflation has continued to moderate noticeable in 2HFY24. Besides the coordinated tight monetary and fiscal policy, other factors such as lower global commodity prices, improved food supplies and high base effect have contributed to the favorable outcome. The committee expects inflation to remain in downward trajectory. However, the committee also noted that this inflation outlook is susceptible to risk emanating from the recent international oil price volatility, potential inflationary impact of resolution of circular debt in energy sector, and tax rate driven fiscal consolidation going forward.

## Advance Calendar of Monetary Policy Meetings

January MPC Meeting; Monday, January 29, 2024
March MPC Meeting; Monday, March 18, 2024
April MPC Meeting; Monday, April 29, 2024
June MPC Meeting; Monday, June 10, 2024
In an efforts to make monetary policy formulation more predictable and transparent in line with international best practice, the central bank has decided to increase frequency of monetary policy reviews from six (6) to eight (8) times a year.

## Apr'24 - Inflation clocks in at 17.34\%

Inflation for the month of April' 24 clocked in at $17.34 \%$ compared to $20.68 \%$ in the previous month. This brings the average 10 MFY 24 inflation to $26.23 \%$ compared to $28.11 \%$ in the SPLFY. Core inflation as measure by NFNE increased by $13.1 \%$ YoY in urban areas whereas it increased by $19.3 \%$ YoY in rural areas. National core inflation dropped to $15.57 \%$ YoY compared to $15.67 \%$ in the previous month.

On monthly basis, inflation eased by $0.43 \%$ driven by food index, which dropped by $2.36 \%$ having highest weight of $34.58 \%$ in CPI basket. The steep drop in the prices of Wheat Flour from PKR 2,726 to PKR $2,410(-11.60 \%)$ followed by declining prices of tomatoes ( $-14.91 \%$ ) and onions ( $-13.21 \%$ ) all contributed towards the drop in food index which for the 9 MFY24 had a run rate of $1.29 \%$. Additionally, HRI index having the second highest weight of $23.63 \%$ in CPI basket also witnessed a drop $1.81 \%$ on the back of reduction in electricity prices, primarily attributable to FCA adjustments from PKR 7.40/unit in March'24 to PKR 7.13/unit (for life-line consumers). On the flipside, clothing and footwear index witnessed an uptick, increasing by $4.49 \%$ amid Eid season, and the transportation index rose by $2.83 \%$ due to fortnightly increase in fuel prices.

Looking ahead, we anticipate lower inflation numbers on the back of higher base effect to continue for the rest of fiscal year. However, second round effects of higher energy prices amid resolution of circular debt and higher tax driven fiscal consolidation as demanded by IMF remains key risk to the overall thesis.

| Consumer Price Index | Weight \% | Apr-24 | Mar-24 | MoM\% | Apr-23 | YoY\% |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Money Market

Prior to the monetary policy announcement, yields in the secondary market declined on the back of an expected rate cut. This trend was driven by continued expectations of a decline in inflation. Sentiments were further bolstered when the current account posted a massive surplus of USD 619 million. However, post monetary policy announcement when the central bank took a cautious approach and maintained the status quo yields trended upwards. In the latest auction held on 30th April, central bank witnessed participation of PKR 890 billion against the maturity of PKR 166 billion and target of PKR 150 billion. Central bank opted for the previous cutoffs and accepted only PKR 72.5 billion in 3-M, PKR 22.5 billion in 6-M and PKR 157.7 billion in 12-M at the cutoff rates of 21.6601\%, 21.3849\% and $20.8990 \%$ in $3-\mathrm{M}, 6-\mathrm{M}$ and $12-\mathrm{M}$ respectively.

| T-bill Auction Results |  |  |  |
| :---: | :---: | :---: | :---: |
| Date | 3M | $\mathbf{6 M}$ | $\mathbf{1 2 M}$ |
| 03-Apr | $21.6001 \%$ | $21.3999 \%$ | $20.8998 \%$ |
| 17-Apr | $21.6601 \%$ | $21.3874 \%$ | $20.8989 \%$ |
| 30-Apr | $21.6601 \%$ | $21.3849 \%$ | $20.8990 \%$ |

In the recent auction of long-term fixed (PIB) bonds held on April 17th, central bank only raised PKR 6.8 billion against the total participation of PKR 144.9 billion. This time again, central bank opted to somewhat maintain the cutoff's and accepted only PKR 4.1 billion in $3-$ Year at $16.65 \%$, PKR 1.6 billion in $5-Y e a r$ at $15.48 \%$ and PKR 1 billion in 10 -Year at $14.35 \%$

In line with the central bank statement of aligning any miss-match between policy rate and secondary market yields frequent OMO Injections were conducted to keep the market close to the policy rate. As evident from access to overnight table below, overnight market remained tight during the outgoing month and traded mostly in between policy rate \& discount rate, with few counters opting for floor facility due to line limit issues.

PKR millions

## Current Account Balance - Back-to-back surplus

As per the data released by the central bank, current account balance for the month of March'24 clocked in at USD 619 million compared to USD 98 million in the previous month and USD 537 million in the SPLFY.

Despite deterioration in Trade balance and Service Balance by $6 \%$ and $13 \%$ on monthly basis, current account posted a massive surplus of USD 619 million on the back of $31 \%$ increase in workers remittances which increased by USD 704 million. This surge is mainly attributed to Ramadan/Eid effect. On imports side, barring metal, petroleum and transport which dropped by $10 \%, 8 \%$ and $3 \%$ respectively all other heads witnessed an uptick in which machinery led the way by increasing $15 \% \mathrm{MoM}$. On exports side, major decline was witnessed in petroleum segment which dropped by $53 \%$ owing to decline in international oil prices. U.S.A remained the top export destination followed by China \& UK. Remittances which majorly supported the current account balance during the month increased by $31 \%$ mainly on the back of Ramadan/Eid effect. Here, top 4 (Saudi Arabia, U.A.E, U.K \& U.S.A) accounted for approximately $71 \%$ of the total proceeds.

During the 9MFY24, trade balance benefitted from increase in exports by $9 \%$ and $8 \%$ reduction in imports as a result overall trade balance improved by USD 5.3 billion, however, service balance deteriorated from USD 374 million to USD 1.6 billion on the back of higher imports of services, as a result overall current account balance for the 9MFY24 improved by $87 \%$ from deficit of USD 4 billion to USD 508 million.

## PSX - KSE-100 index up by 6.12\% MoM

The KSE-100 index gained $6.12 \%$ during the month of Apri'24 to close at 71,102 points. This brings the CYTD return to $13.85 \%$ while FYTD return stands at 71.53\%.

Bullish momentum persisted in the local bourse, with the index climbing to an all-time high of 72,742 points on 26th April. This momentum was fueled by expectations of a decline in interest rates due to a decline in inflation expectations, better-than-expected current account data, and Saudi Arabia's reaffirmation to invest a committed USD 5 billion in multiple sectors of the economy. Additionally, the completion of the IMF's second and final review under the SBA program and the immediate disbursement of USD 1.1 billion further propelled investor sentiment. The average trading volume for the KSE-100 increased from an average of 163 million shares in March 2024 to an average of 243 million shares in April 2024. Foreign investors once again remained in the spotlight with net investments of USD 48.2 million, whereas local investors, barring mutual funds and broker proprietary accounts, were net sellers.

Difference in different data sources (SBP vs. PBS)
The trade figures reported by SBP in the balance of payments do not match with the information provided by the Pakistan Bureau of Statistics. This is because the trade statistics compiled by SBP are based on exchange record data, which depends on the actual receipt and payment of foreign exchange, whereas the PBS records data on the physical movement of goods (custom records). Furthermore, SBP reports both exports and imports as free on board (fob), while PBS records exports as free on board (fob) and imports include the cost of freight and insurance (cif).
